WARNING: READ THIS IMPORTANT SAFETY INFORMATION BEFORE USING

A small percentage of people may experience seizures when exposed to certain lights, patterns or images that may appear in video or computer games. This may occur even with no history of epilepsy or seizures. If you, or anyone in your family, have an epileptic condition or history of epilepsy, consult your doctor prior to playing. Parents should monitor the use of video games. Children and teenagers are more likely than adults to experience photosensitive seizures.

IMMEDIATELY discontinue use and consult your doctor if you or your child experience any of the following symptoms or other discomfort while playing a video game: dizziness, blurred or altered vision, eye or muscle twitches, loss of consciousness, disorientation, any involuntary movement or convulsion.

To help reduce the risk of photosensitive seizures take the following precautions:

- **Play in a well-lit room.**
- **Do not play if you are tired, drowsy or fatigued.**
- **Rest for at least 10 to 15 minutes per hour while playing.**
- **Sit farther from the screen.**
- **Play the game on a smaller screen.**
